Spring

About

Spring is the story of a shepherd girl and her dog, who face ancient spirits in order to continue the cycle of life. This poetic and visually stunning short film was written and directed by Andy Goralczyk, inspired by his childhood in the mountains of Germany.

The Spring team used the development version of Blender 2.80 for the entire production before the software was in official Beta even. As for all of Blender's Open Movies, the entire production process and all its source files are being shared on the production platform Blender Cloud.

Made by: Blender Animation Studio.

Format: 3D animated film, 7:44 minutes. 5.1 sound. No dialogs. Fit for an audience of 6 years and older (PG). Everything you see was made with Blender, GIMP and Krita.

Licensing

The Spring Open Movie is released un the Creative Commons Attribution 4.0 license. This includes all the data we publish on this website. If any content on this site is not licensed as such, it will be clearly indicated.

In short, this means you can freely reuse and distribute this content, also commercially, as long you include proper attribution.
